

## BOARD WORK SESSION

*This is a tentative agenda and can be modified at any time prior to the meeting. No formal vote will be taken by the Board of Mayor and Aldermen during the work session.*

**December 8, 2014**

**5:15 – 5:45 Update on Royal Pecan Drainage Study** – On August 11, 2014, the BMA entered into a contract with Buchart Horn to study the Royal Pecan Subdivision drainage sub-basin and identify potential causes of flooding.

Flooding in this area has caused home and property damage. The study is evaluating potential solutions that will need to be considered as future capital projects. Progress that has been made to this point includes collection of field data, analysis of existing conditions, and evaluation of alternatives. Additional progress includes identification of what appears to be the best ways to address the flooding problem.

This session is for informational purposes only to inform the BMA on causes of flooding and possible solutions being considered.

Staff Point of Contact: Dale Perryman (Town Engineer)
